RECORDED

A.D. 1860, 22nd FEBRUARY. N° 478.

Boiling Worts and other Liquids.

(This Invention received Provisional Protection only.)

PROVISIONAL SPECIFICATION left by Robert Davison at the Office of the Commissioners of Patents, with his Petition, on the 22nd February 1860.

I, ROBERT DAVISON, of London Street, in the City of London, Civil Engineer,
5 do hereby declare the nature of the said Invention for "**AN IMPROVEMENT
IN BOILING WORTS AND OTHER LIQUIDS,**" to be as follows:—

Worts and liquids have hitherto generally been boiled by the naked fire, or
by worms or coils containing moist steam. Now, it has been discovered that
both these means are for many purposes objectionable, and that a sufficiently
10 high temperature cannot be obtained by the employment of moist steam. My
Invention then consists in the application and employment of superheated
steam, whereby the desired temperature can be obtained, and in the boiling
of worts particularly many other advantages will result.
